Movable Heating Panel adapted to Microwave Oven

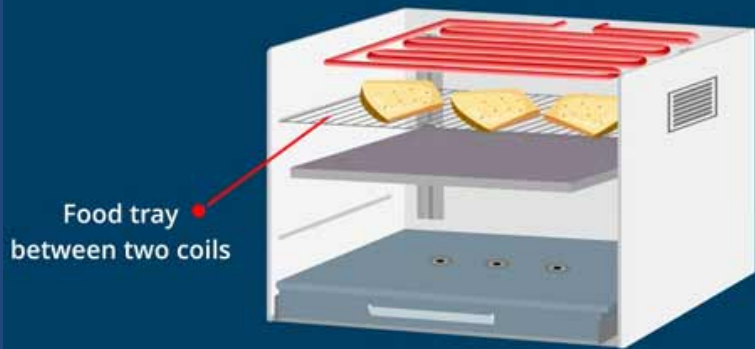

Microwave Oven with two Broiler Coils!

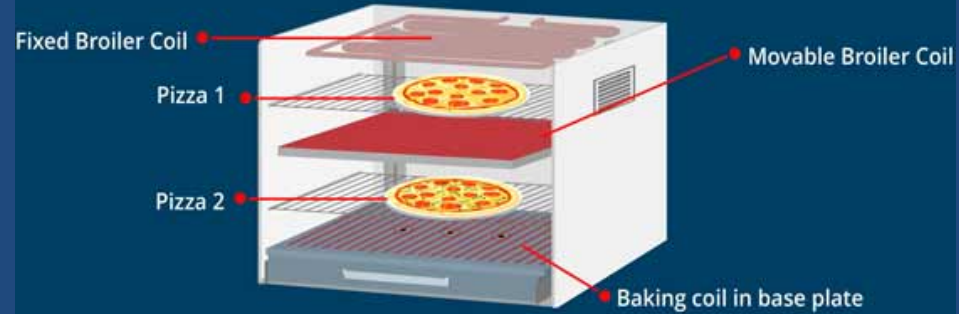

Microwave Oven with two Broiler Coils!

The Movable Heating Panel is a single heating panel attached below the Fixed Grill Coil in the Microwave oven

Microwave as a Bread Toaster!

Bake two pizzas at a time!

The Movable Heating Panels positioned in the middle - and parallel to the fixed grill coil, converts the oven cavity into two parallel cavities one above the other, ideal to toast bread or bake two pizzas at a time

Vertical skewers

Top Bar for rotating suspended food items

The Movable Heating Panel folds against the back wall of the Microwave Oven, and provides heat to the food items from all sides during rotation, and from the top as well

Movable Heating Panels, Extendable Base Plate with Rotational Slots, and the Top Bar, can all be adapted to Microwave Ovens easily, making the Microwave Oven much more versatile and user friendly

Do get in touch for licensing the technology for your Microwave Ovens!

Thank You !
