The Multifunctional Oven is a combination of the Conventional Oven, The Toaster Oven, Bread Maker, Vertical Skewer Oven and the Bread Toaster – all rolled into one

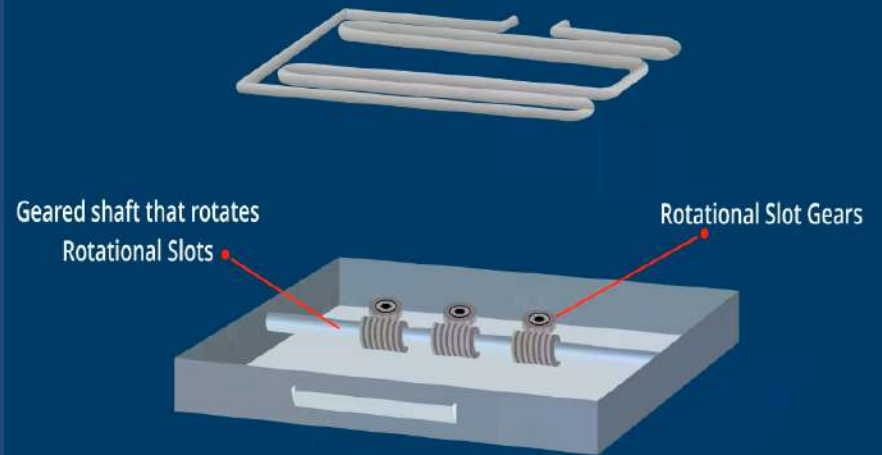

# Multifunctional Oven

**Movable Heating Panels**

**Inside the Extendable Base Tray**

## Patented Features of The Multifunctional Oven

1. Movable Heating Panels
2. Extendable Base Tray with Rotational Slots, and
3. Top Bar (patent pending)

*All features can be adapted to Microwave Ovens too!*

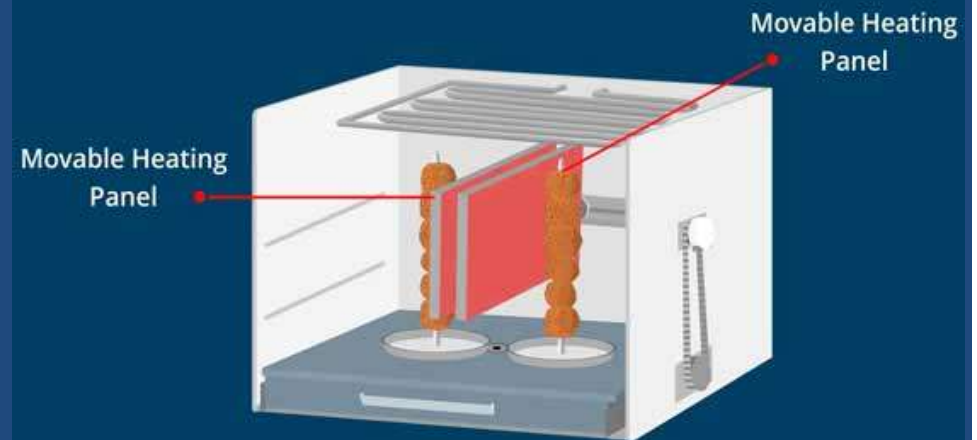

**Difficult to skewer food items such as corn-on-cob, meat with bones or frozen meat**

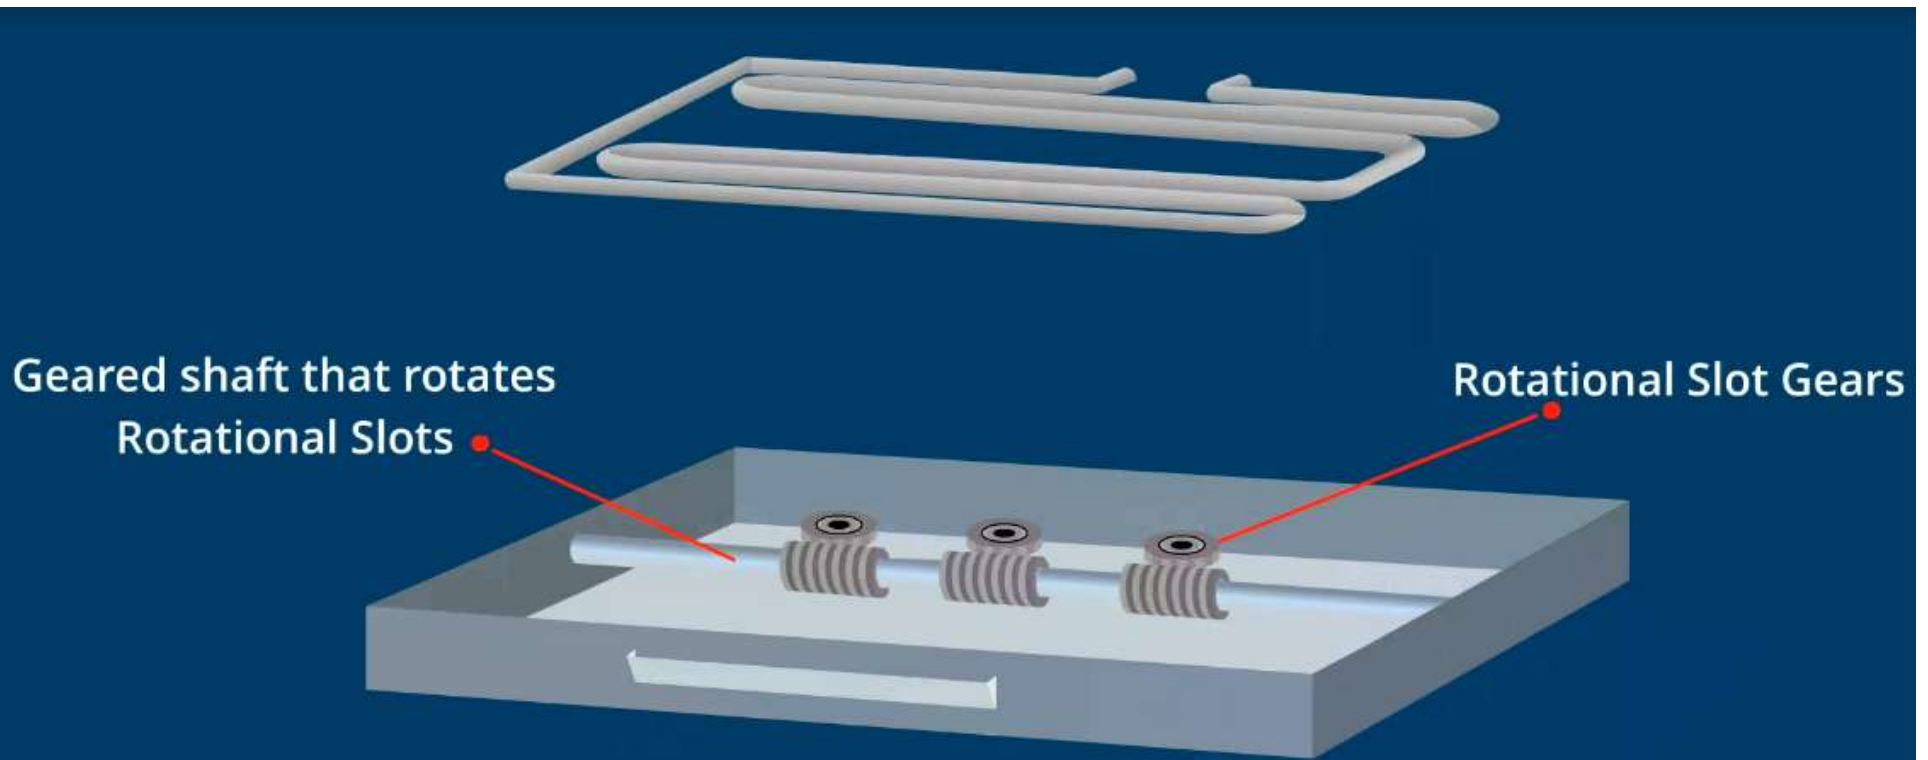

**Cook two pizzas at the same time!**

*Movable Heating Panels* can be positioned on the sides or the middle, horizontally or vertically, so that the heating panels provide heat to the maximum surface area of the food item

**Rotational Slots for Vertical Skewers**

## Inside the Extendable Base Tray

The Extendable Base Plate with Rotational Slots and Baking Coil, allow Vertical Skewers, Rotating Food Stands and Bread Makers to be easily plugged in and removed

Movable Heating Panels  
in Position 1

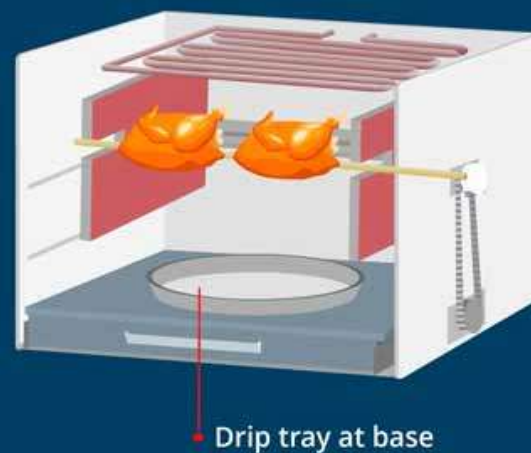

Movable Heating Panels  
in Position 1

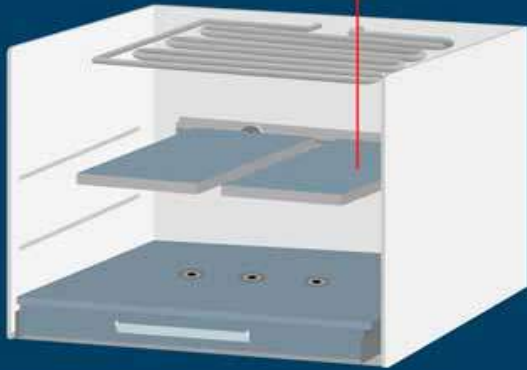

Central Rotational Slot for Bread Maker

When the Movable Heating Panels are in Position along the side walls, the full cavity can be used - for baking cakes, using Bread Makers or a horizontal rotisserie

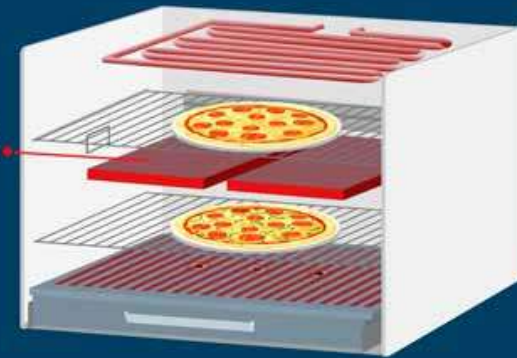

Movable Heating Panels  
Position 2

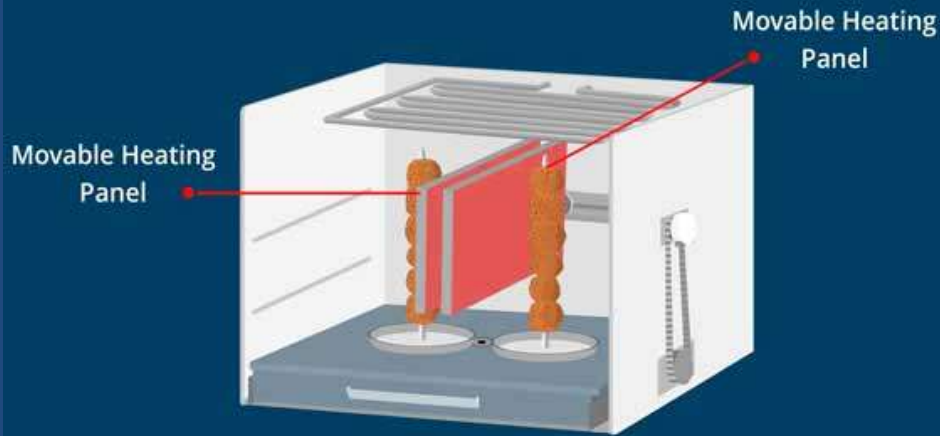

Movable Heating Panels

Movable Heating  
Panel in Position 2

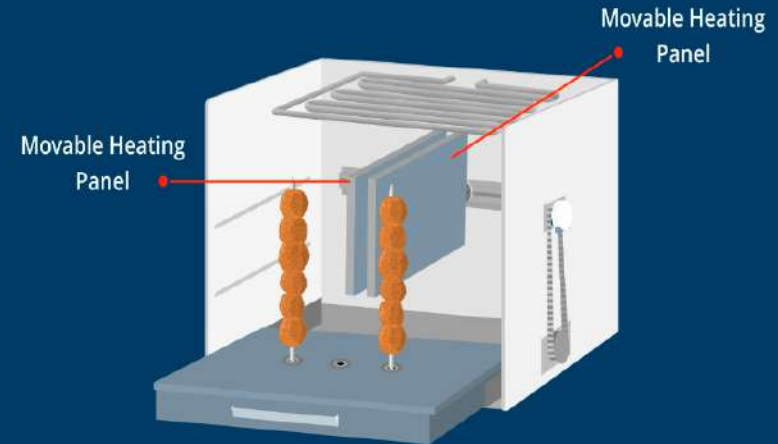

Cook two pizzas at the same time!

When the Movable Heating Panels are horizontally positioned in the center, they partition the oven into a double oven. Great for baking two pizzas simultaneously or toasting bread!

Rotational Slots for Vertical Skewers

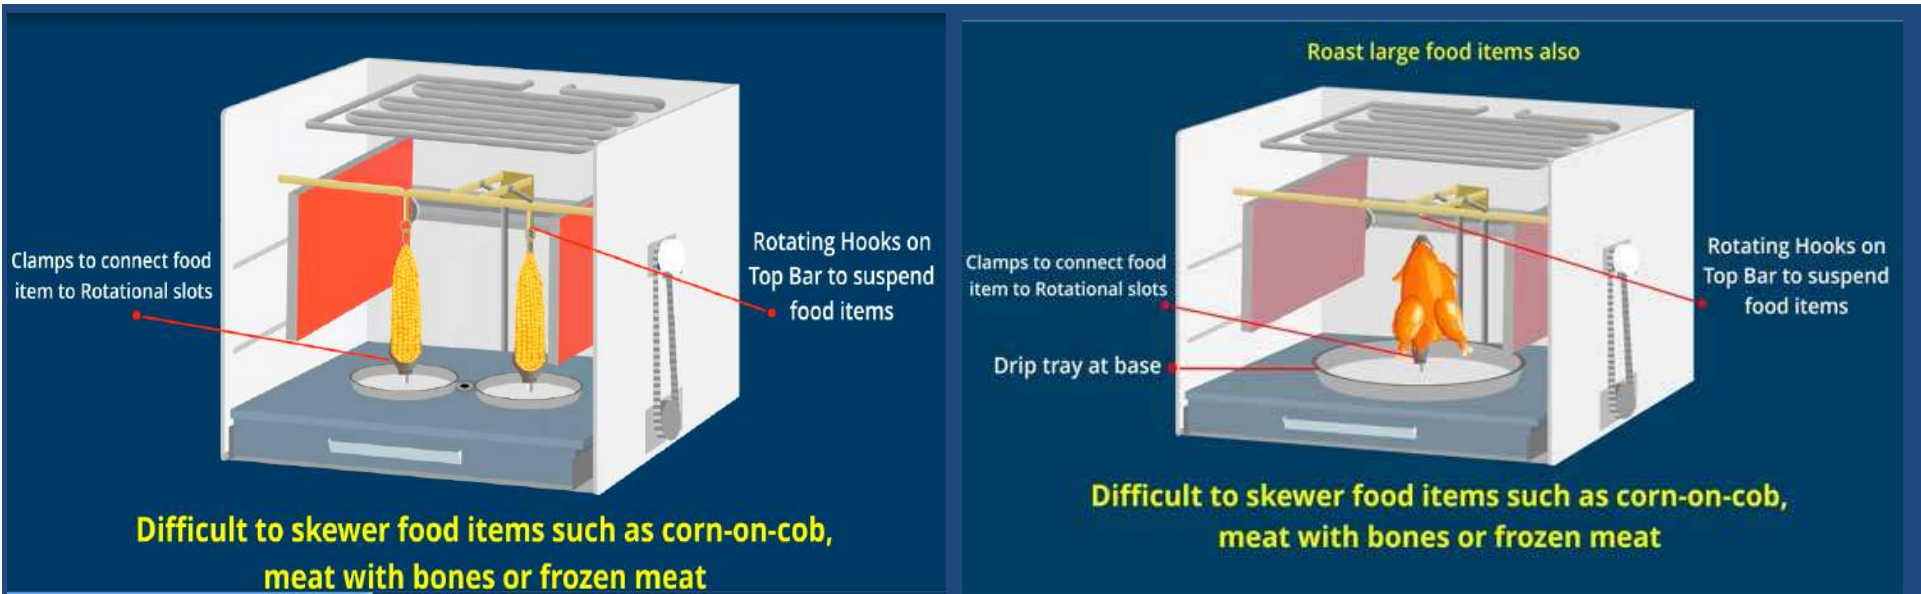

Rotational Slots for Vertical Skewers

Vertical rotating skewers are a great way to roast kebabs – with heating panels facing the length of the skewer by positioning the Movable Heating Panels in the middle.

Loading the kebabs is easy, as the Extendable Base Tray can be pulled out and the skewers plugged in!

Difficult to skewer food items such as Corn On Cob, frozen meat or meat with bones can be suspended from the Top Bar, connected to the Rotational Slots on the Extendable Base Tray and rotated, while heat is provided by the Movable Heating Panels at the sides
